Tutorials & Examples

Tutorials and examples show the most easy way, how to prepare a hallo word application or apply basic flow principles.

Currently there are available:

- 1 minute Tutorial shows XML file and three lines of java code necessary to run flow in your application
- 5 minute Tutorial shows full flow example of XML configuration features and java code with annotated methods
- Online example application shows Wicket/Spring/BOSS Flow how it works together, there's source code of example.

Browse Examples Source Code on SourceForge.net, of course you must have an account there to access files

or

Download Examples Source Code from Maven Repositories.
