# Using Maven

BOSS Flow is built by Apache Maven. Check the latest version of BOSS Flow from the Maven Central Repository.

There are no other dependencies to build your project. All other inner dependencies are just for building, testing and reporting.

**groupId:** cz.wicketstuff.boss

**articatId:** boss-flow

### Maven Dependency

```
<dependency>
    <groupId>cz.wicketstuff.boss</groupId>
    <artifactId>boss-flow</artifactId>
    <version>1.3.1</version>
</dependency>
```
